CRASH MANAGEMENT

Make sure you are not running XFire, Afterburner, EVGA, other kind of tools and overlays.

NVidia GeForce Experience can produce issues with the ReShade, same with Steam Overlay enabled in-game.

Start the game in admin mode.

Trainers can conflict with ReShade!

If the game crashing with this mod I recommend to use **Simple Trainer for GTA V!**

With this trainer I can start the game without crash in 99% of starts.
